

IE builds skills at MSSD

Teachers everywhere are concerned about teaching students thinking and problem-solving skills, but MSSD is a pioneer in using a planned program to develop such skills.

How to compare and categorize, the impact of today on the events of tomorrow, the importance of point of view, the nature of hierarchies, and how to follow directions are just a sample of the basic thought processes MSSD is helping its students develop through a program called Instrumental Enrichment (IE).

IE includes prepared materials and activities with which students can practice specific thinking and problem-solving tasks and then apply, or "bridge," them to other classwork or real life situations. "We're trying to make a connection for students," said Mary Hockersmith, MSSD principal. "Life isn't divided into departments." IE also helps students stop and think instead of acting on impulse, she said.

IE is a three-year program that MSSD incorporated into its curriculum in 1981. David Martin, assistant professor and coordinator of undergraduate teacher preparation in the Gallaudet College Department of Education and a trained IE instructor, taught MSSD teachers IE, which was developed by Israeli psychologist Reuven Feuerstein in the 1950s.

Because evaluation data from the first year was so positive and teachers taking the training were excited, additional teachers received training during the 1982-83 school year and began using IE with approximately 60 students.

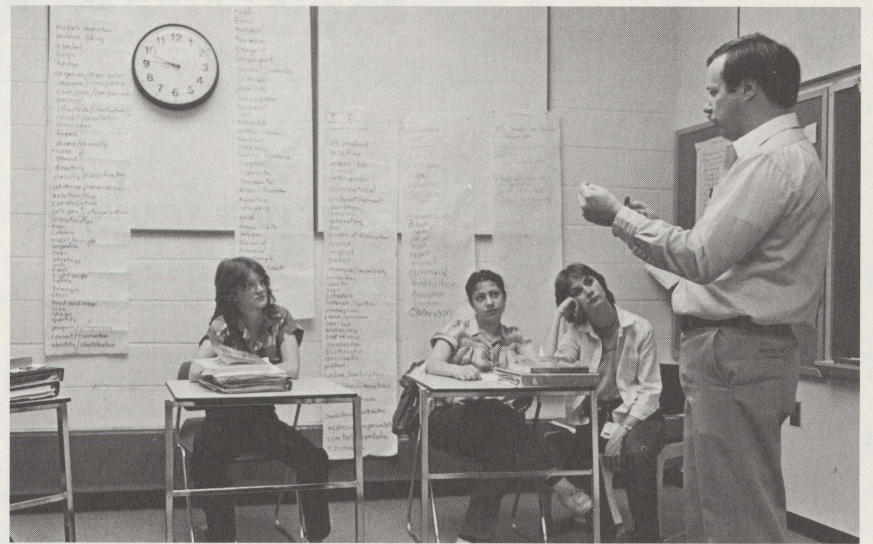

After one year in the IE program,

students "seemed more willing to consider another person's point of view," Hockersmith pointed out. She also said that teachers trained in IE seemed to be using a different questioning style. They asked students to be more specific, and teachers seem to be more thoughtful about what they're doing. Hockersmith added that the principles of IE agree with her philosophy as a teacher and administrator that it's never too late to develop cognitive skills in students.

During the first two years of IE at MSSD Martin and members of the research division at Gallaudet collected data to evaluate the impact of the program on the 10 students who began IE in 1981. They used a control group for comparison. Martin said he hoped to see hearing impaired adolescents receive the same effects from IE as other groups using it, and he did. For example, when measured on abstract thinking at the end of the second year, IE students had gains twice as high as the gains of the control group. When the IE group was compared with the rest of the MSSD student body on math computation, the IE group had almost twice as much growth in that area. "The significance of these findings is that they corroborate what previous research has stated. Learning potential of hearing impaired adolescents doesn't differ from the general population," said Martin.

MSSD math instructor Jay Innes and English instructor Cindy Rohr-Redding taught IE to the 10 students the first year on an experimental basis. Additional faculty and students joined the

Math instructor Jay Innes uses Instrumental Enrichment principles in his classes at MSSD.

Collegiate Faculty Sets Meeting

The Collegiate Faculty of Gallaudet College has invited Dr. Lloyd Johns, president-elect, to talk informally with them at the first faculty meeting of the academic year. The meeting will be held Sept. 19 at 4:30 p.m. in HMB Room 213.

Catherine Ingold, head of the Honors Program and chairman of the Collegiate Faculty of Gallaudet, said that the meeting time has been changed from 4 p.m. to 4:30 p.m. to accommodate travelling Northwest Campus faculty members. Ingold and the other officers, vice-chairman Horace Reynolds, professor of Psychology and secretary Robert Bailey, instructor of Business Administration, were elected by the faculty during last year's closing meeting.

Members for six standing committees were also elected by the faculty in April. During the summer each committee has begun preparation for the election of its own chairman. Jim Achtehn, assistant professor of Education,

is the new chairman of the Faculty Welfare Committee (A). The nine member Undergraduate Curriculum Committee (B) which studies issues such as salary schedules and reviews, has elected Ed Krest, assistant professor of mathematics, as its chairman. Faculty and Student Affairs are the focus of Committee C which is chaired by Catherine Kalbacher, assistant professor of English. Carol LaSasso, associate professor of Education, chairs the Committee on Nominations, Academic Discipline and Grievances (D). Marin Allen, assistant professor of Visual Media, was elected chairman of the Continuing Self Evaluation Committee (S). The Committee on Preparatory Studies has not yet elected a chairman. In addition to the standing committees, the Simultaneous Communication Panel will be led this year by Agnes Padden, assistant professor of English. The Graduate Council of the Collegiate Faculty will be electing a chairman this fall.

Ingold said the agenda of the first meeting will be relatively light and will include the introduction of new faculty members, reports of officers and possibly a few items of new business. Faculty members should have received an agenda in the mail. For further information contact Catherine Ingold, x5771.

Faculty update

The student support services of the Gallaudet Campus will be easily accessible to students of the Northwest Campus. The Counseling and Placement Center will have four developmental counselors at the new site to assist preparatory students with personal and career counseling. These four counselors are Ellen Bernstein, Madie Davis, Sandi LaRue and Dick Arthur.

TTYs ring for Gallaudet College

The 2nd Annual Gallaudet College Fund (formerly called the Annual Fund) campaign will be conducted Sept. 19-22 and 26-29, but this year it will have a different ring to it. The campaign will try a new concept—TTY-a-thon.

"This is the first time we are using at TTY-a-thon approach," said Ernest Hoffman, coordinator of the Fund in the Development Office. "Since this is a new twist, we have selected two areas—Washington Metropolitan and Northern California—to have a TTY-a-thon where alumni will be contacted via TTY." All other areas around the U.S. will be operated with personal contact and direct mail. NorCal is having its TTY-a-thon Sept. 12-16.

Chairperson for the Metro area TTY-a-thon is John Krpan, coordinator of the Visitors Center. "We will try to reach all alumni (approx. 1,400) in DC, VA, MD, and W V during the 8

day campaign," said Krpan. A bank of 15 TTY's will be installed in the Ely Center workshop room and volunteers will call alumni between 6:30 p.m. and 10:00 p.m. "I would like to have 120 volunteers so that no one would need to contribute more than one evening of his or her time in making telephone calls," commented Krpan.

Deaf or hearing persons who would like to volunteer one evening in assisting in this unique TTY-a-thon should contact John Krpan in the Visitor's Center, Chapel Hall, or call him on x5100 V/TDD.

Alumni in the Washington and the NorCal areas have been sent a postcard from the Development Office informing them to expect a TTY call during the campaign. If the results are encouraging, Hoffman said that next year a nationwide TTY-a-thon may be tried for the Gallaudet College Fund campaign.

"The History of Technology"

Thurs., Sept. 15 3-4:30 p.m.

Learning Center LN-11

"The History of Technology" will be the first in a series of lectures on computer science to be presented by Louise Perkins, Gallaudet's visiting professor and lecturer from the Lawrence Livermore National Laboratory in California. The lecture will trace the history of machines from early mechanical models to the computers of today and explain how computers are different from all other machines.

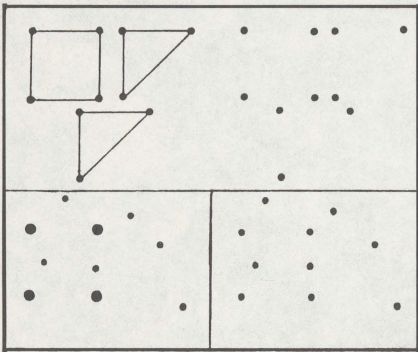

IE builds skills

continued from page 1

program last year. As the first group enters its final year of the three-year IE training, evaluation shows benefits to both students and teachers who now stop and think before acting.

This school year IE enters a new era as interdisciplinary teams form to introduce entering students to IE and then "bridge" those concepts to English, math, social studies, career development and communications.

Not only will this approach provide an IE continuum to these students, it also will allow MSSD's faculty to amend the program further specifically for hearing impaired students so it may be disseminated nationwide.

This sample task is from the first group of exercises in IE. The student must label, be precise, plan, determine a starting point, search systematically for a pattern, and compare possible responses.

PACE prints brochure

The Fall/Winter PACE, Programs in Adult and Community Education, brochure is here. There are numerous course offerings for Deaf Adults either sponsored by PACE or various local community agencies. Please call PACE at 651-5597 to have a brochure sent to you or feel free to stop by the office (Gallaudet College, College Hall, Room 213) to pick one up. Since courses fill up quickly, please register as soon as possible.

Jay Innes shows a MSSD student how to construct an angle. He and English teacher Cindy Rohr-Redding were the first instructors to team-teach using I.E.

Families provide weekend homes

by Joni Johns

Phyllis Kass, MSSD social worker, is looking hard for area families who will open their home to deaf students whose own families live far away. Students from across the country choose MSSD for its academic and residential programs. For many of them the time and expense involved in monthly trips home present serious problems.

"Many requests have been made already this year due to the large number of out-of-area students," Kass said. "In order to maintain these students here at MSSD, placements must be found for closed weekends."

Although the mechanism for placing students in the homes of local families has existed in some fashion for several years, the formal program is a more recent development. Community Family Homes Program, as it is called, has successfully operated out of MSSD's Clinical and Support Services office for the past two years.

Single adults, "empty nest" parents, parents of young children—all kinds of families have hosted students. The only situation Community Family Homes won't consider are families in which no one signs.

The motivations for families vary, but families with other deaf children find the companionship of another deaf child particularly nice, Kass said.

"It's not necessarily every closed weekend either," she added. "Most often, it's the beginning of the school year, before the kids have made friends. Usually, by Christmas, they're staying with the families of area students they have befriended."

Families are selected for the program after submitting an application and having a home visit. The program reimburses families \$15 a day for room and board expenses. Students are expected to finance any special activities.

Interested people are encouraged to apply by contacting Phyllis Kass at MSSD, 651-5881 (voice or TDD).

Sponsored R&D

Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff and graduate students. More details on programs of interest can be obtained from the Office of Sponsored Research, x5030 (voice or TDD).

Deadline Program

10/15/83	NSF: Science and Technology to Aid the Handicapped
10/15/83	Kellogg Foundation: Kellogg National Fellowship Program
11/01/83	ADAMHA: Prevention of ADM Problems in Children and Adolescents
11/07/83	NEH: Youth Projects
11/18/83	ED: College Library Resources Program
No Specific Deadline	NSF: Honors Workshops and Materials Development for Pre-College Science and Mathematics

Library Program

The Department of Education is inviting applications for its College Library Resources Program for fiscal 1984. Applications are due November 18, 1983.

This program will award small grants (not to exceed \$10,000) to improve library resources in institutions of higher education and nonprofit libraries which serve these institutions.

Congress approved \$2 million for the program in 1983 and thus far 2,141 grants averaging \$890 each have been awarded.

In its budget request, the Reagan administration has not asked Congress to fund these grants in FY 1984, but the Department of Education is inviting applications in the event that Congress decides to fund the program as it did last year.

For further information, please contact the Office of Sponsored Research or call Frank Stevens or Beth Fine, Library Education, Research and Resources Branch, Division of Library Programs, U.S. Department of Education, Suite 275, Brown Building, 400 Maryland Avenue SW, Washington DC 20202, 254-5090.

DOSS cautions motorists

Gallaudet's Department of Safety and Security is encouraging all campus personnel to be more careful when parking vehicles on campus. In the last two months five cases of vandalism of vehicles have been reported.

All five incidents occurred in the MSSD parking lot, level B. In all cases the vehicles either were not locked or a window was left open allowing entry to the car.

According to DOSS personnel the individual committing these crimes is apparently an amateur. The only items reported stolen have been loose change, knobs from radios and a power booster. It is also obvious that the person is looking for unlocked vehicles.

DOSS requests that all drivers take the following precautions:

1. Lock your vehicle when you park it.
2. Remove all items of value from the passenger section and lock them in the trunk or take them with you.
3. Report any suspicious persons or vehicles in parking areas to the campus police, x5555 voice or x5666 TDD.

Among Ourselves

Peter Hobbs, assistant principal at MSSD and Timothy Frelich, program supervisor, MSSD Residence Program, have been selected as 1983 Outstanding Young Men of America.

The program's board of advisors selected Hobbs and Frelich from nominations received from senators, congressmen, state legislators, and university and college presidents as well as various civic groups. Both have distinguished themselves in one or more fields of endeavor. The criteria for selection include a man's voluntary service to community, professional leadership, academic achievement, business advancement, cultural accomplishments and civic and political participation.

Deborah Sonnenstrahl, director, Fine Arts in Education, gave three presentations at the National Symposium on Access to Cultural Programs sponsored by the National Endowment for the Arts at Indiana University last month. She spoke on "The Artist's Perspective on Accessibility," was featured on local television, and participated in workshops.

Nancy Kensicki, associated professor, English, received an award this summer to honor her dedication to communication and collegiality as founding president of the Section of English Teachers of the Deaf, affiliated with the Convention of American Instructors of the Deaf (CAID). Kensicki, who has given up her eight-year term as president of the Section this year, has been elected editor-in-chief of the Section's journal, "Teaching English to Deaf and Second-Language Students."

Three members of the Department of Counseling—William McCrone, Roger Beach and Frank Zieziula—have edited a monograph, "Networking and Deafness." The 247-page monograph has been published and is being sold through the office of the American Deafness and Rehabilitation Association. It focuses on networking systems related to job placement and rehabilitation services for deaf people and social service delivery to deaf-blind people.

Patricia Cinelli of the Alumni and Public Relations Office has received her certificate for basic and open water scuba diving certification from PADI.

John Scott, director of Marketing and Program Development for College Educational Resources, was elected vice chairman of the Board of Directors of the National Federation of Local Cable Programmers at the cable television association's 1983 national convention on Portland, OR. At the July convention, Scott presented four workshops on cable television issues: "Raising the Quality of Local Origination Programming," "Marketing and Audience Development for Educators and Librarians," "Human Services—Community Organizations: Focus on the Future" and "Cable Access Issues for the Hearing Impaired."

Sherry Polvinale, a librarian known to both the Gallaudet and MSSD Learning Centers, has resigned to operate her own child care facility in Bowie, MD. Faculty, staff and students wish her success. Her center is located at 12205 Mackell Lane, Bowie, MD 20715, and her phone number is 390-6137.

MSSD Dean Lee Murphy has accepted a three-year appointment to the District of Columbia's State Advisory Committee to the Commission on Secondary Schools of the Middle States Association of Colleges and Schools. The State Advisory Committee reviews reports and records and makes recommendations regarding secondary schools involved in the accreditation process. It is made up of administrators and faculty of accredited public and private secondary schools. MSSD received Middle States accreditation in 1980.

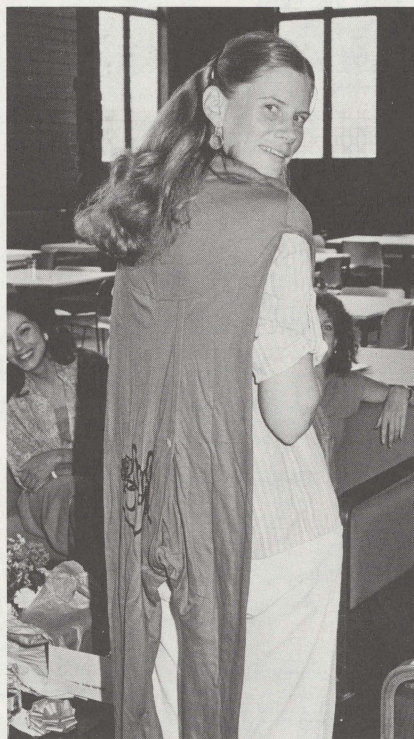

Auto registration due

The Department of Safety and Security has extended the expiration date of this year's decal to Sept. 30, 1983.

Anyone wishing to register a motor vehicle may do so now by stopping by the Department of Safety and Security from 8 a.m.-3:30 p.m. Monday through Friday.

No one who has outstanding traffic tickets will be allowed to register an automobile. To register a vehicle, persons must provide insurance information, including policy number and expiration or renewal date, driver's license and registration.

For questions about automobile registration, contact Charles Jones or Floyd Holt, x5563.

Vickie Walter

Walter leaves Gallaudet behind

Vickie Walter, who has been the editor of *On The Green* since 1979, has resigned from her position at Gallaudet to take a 10-month work and study course at Claymont in West Virginia.

With Walter as editor, OTG evolved from a simple, two-page green sheet to a four-page tabloid complete with photographs. In 1980 Walter received the Exceptional Achievement Award for Periodicals Improvement for OTG from the Council for the Advancement and Support of Education. Besides editing OTG for the Office of Alumni and Public Relations, Walter also served as the coordinator of Internal Relations.

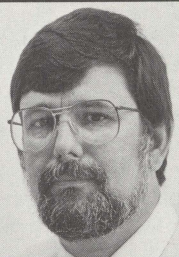

Walter arrived at Gallaudet with experience as editor of a bi-monthly tabloid newspaper, a reporter for daily newspapers and a U.S. congressman's press aide. According to informed sources, her background in weighing frozen chickens, teaching stress reduction and tap dancing on the radio also served her well in the Crow's Nest where her office was located.

At Claymont, the 400-acre farm which is the setting for an experiment in cooperative living based on the studies and teaching of G.I. Gurdjieff, Walter will do farm work, chop wood, meditate, learn Turkish and play the banjo. Cards, letters and chocolate chip cookies may be sent to Walter at Claymont Court, Charlestown, WV.

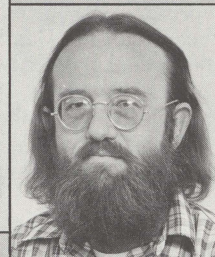

Nancy Connors has been impressed into service as acting editor of OTG until Walter's replacement is on board.

Personalities

Howard Busby is the new assistant dean for Student Affairs at the Northwest Campus. Busby, who moved here from Tucson, AZ, has prior teaching and administrative experience in deaf education. His responsibilities at the Northwest Campus include assisting Dean Ann Davidson and coordinating student affairs programs.

Busby

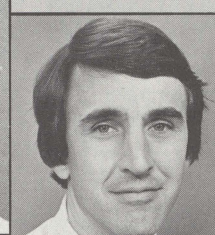

Treece

Nelson Treece, an English instructor at the Northwest Campus, came to Gallaudet from the American School for the Deaf where he taught high school English. Treece holds two MA degrees, one in Linguistics and the other in Education of Hearing Impaired.

Cynthia Edwards is an English instructor at the Northwest Campus. She has moved from Binghamton, N.Y. where she taught English in a mainstream public high school program. She received her MA from Gallaudet College.

Edwards

Johnson

Robert Clover Johnson is an editorial assistant in the Research Institute. He has an MA in English from the University of Virginia. Johnson worked until August at the National Rehabilitation Information Center.

Michael

Trivelli

Sandra Michael is a secretary in the Gallaudet Bookstore. She previously worked at the First National Bank of Maryland and attended Charles County Community College.

Lucy Trivelli is an assistant to the dean, Operations, in the Research Institute. She previously taught special education classes in public schools. Trivelli earned an Ed.M at Harvard University.

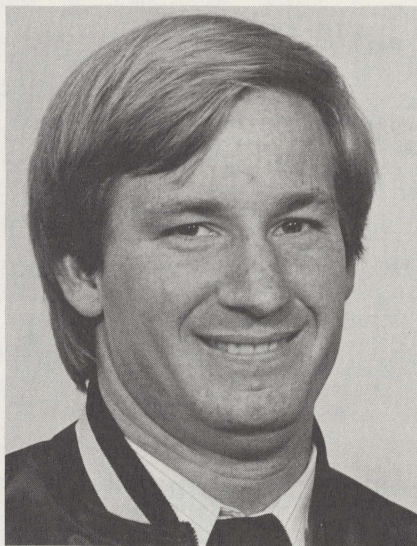

New coach named at Gallaudet

Kenneth Kramer, a 1979 Gallaudet graduate and former gridiron star, has been selected as the new head football coach. He replaces Ricky Suiter, who stepped down to complete his studies for an advanced degree.

Kramer has served the previous two seasons as defensive coordinator, and under his coaching in this area the Bison defensive game has improved tremendously. "We still need to improve the defense even more so they can protect the lead," he said.

Kramer graduated from the Indiana School for the Deaf in 1974. During his college years he was selected to the Second Team All American. He was also voted by his teammates as the Best Defensive Player twice and received the Most Valuable Player Award in 1978. He is currently employed by the U.S. Department of Education as an operating accountant.

The football team began practice

Kenneth Kramer

Aug. 27 in preparation for the season's opener on Sept. 24. The Bison will play the University of North Carolina-Wilmington Club beginning at 1 p.m. at Gallaudet.
